

## **8th International Symposium on Electronics, Automatics and Robotics**

### **Thematic guidelines**

#### **Electronics**

Design of systems and electronic devices, configurable hardware and virtual instrumentation. Sensors, networks of sensors and their applications IoT in Electronics. Alternative emergent technologies to produce devices and microelectronic and nanoelectronic sensors.

#### **Automatics**

Automation applications in productive systems. Modeling and advanced control of condition monitoring and failure diagnose processes in industrial systems

#### **Robotics**

Applications of mobile robotics. Collaborative robotics and 4.0. Industry Control of manipulator arms.

Teaching electronics, microelectronics, nanoelectronics and automatics. Educational robotics

### **Organizing Committee**

#### **President of the Organizing Committee:**

DrC. Enrique Ernesto Valdés Zaldívar

Institution: Technological University of Havana "José Antonio Echevería", CUJAE
