

Especial Session: Workshop “Digital Transformation and Observatories”

Goals

To share the good practices about the impact of observatories on the digital transformation of society.

Thematic guidelines

- Impact of the observatories on digital transformation and on public policies.
- Challenges and good practices related to technological and scientific observatories as part of the university-enterprise-society relationship
- Systems of indicators to measure the progress made in terms of digital transformation and digital government.
- Role of the observatories in knowledge management for digital transformation
- Digital literacy and observatories

Participants

- Coordinators and specialists from national and international digital government observatories
- Digital government observatories' researchers.
